

MOHAMMAD ADNAN

Flutter Developer

+91 8085302570 mohammadadnanflutterdev@gmail.com LinkedIn | GitHub Indore, MP

SUMMARY

Flutter Developer with hands-on experience building scalable cross-platform mobile applications using Flutter, Firebase, and Riverpod. Skilled in REST API integration, state management, real-time applications, and responsive UI development. Experienced in building production-ready apps with authentication systems, payment gateway integration, cloud services, and modern mobile architectures. Passionate about building performant and user-centric mobile experiences.

EXPERIENCE

Junior Flutter Developer

Big Nation 7 Infotech

11/2025 Indore, MP

- Developed and maintained 3 production-ready Flutter applications used for e-commerce and on-demand services.
- Implemented core features including product browsing, cart, wishlist, secure checkout, order tracking, and Razorpay payments.
- Designed and built User, Worker, and Admin apps for a service-booking platform.
- Built reusable and responsive UI components from Figma designs.
- Integrated Google Maps API for real-time worker discovery and service tracking.
- Followed clean architecture principles with scalable state management using Riverpod.

Flutter Developer Intern

Eéna

08/2025 – 09/2025 Indore, MP

- Implemented OAuth-based authentication flow with secure JWT session handling.
- Implemented Google and Instagram authentication using OAuth flows.
- Developed API integrations for uploading videos and products, ensuring smooth client-server communication and error handling.
- Worked closely with backend APIs, handling token-based authentication, multipart requests, and JSON data parsing.
- Improved app functionality by applying best practices in API integration, state management, and error handling.

Education

Bachelor of Technology in Computer Science Engineering

Malwa Institute of Technology

08/2021 – 05/2025 Indore, MP

CGPA: 8.28

Higher Secondary Education

Rock Wood Higher Secondary School

07/2020 – 06/2021 Indore, MP

Percentage: 81.8

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Cross-platform Development, Responsive UI.

State Management: Riverpod, Provider.

Backend & APIs: Firebase, REST APIs, JWT Authentication, OAuth.

Integrations: Google Maps API, Razorpay, Media Upload, Real-time Chat.

Architecture & Practices: Clean Architecture, MVVM, Reusable Widgets, Error Handling.

Tools: Git, GitHub, Android Studio, VS Code, Figma, Postman.

Programming Languages: Dart, Python, Java, C/C++

PROJECTS

HeyBuddy | Flutter, Firebase, Riverpod

- Developed a real-time social media app with authentication, chat, friend system, and photo/video sharing.
- Implemented responsive UI, Firebase integration, and scalable state management using Riverpod.
- Designed scalable Firebase database structures for chat, user profiles, and social feed management.
- GitHub: github.com/adnanflutterdev/HeyBuddy

Musify | Flutter, Firebase, Riverpod

- Built a music streaming app with online playback, listening history, and playlist creation.
- Integrated Firebase Authentication, cloud storage, and song upload features.
- Built audio playback functionality with background and foreground streaming.
- GitHub: github.com/adnanflutterdev/Musify

my_progress_bar | Flutter Package

- Developed and published a reusable Flutter package for customizable progress indicators and sliders.
- Designed flexible and reusable widgets with configurable animations and styling.
- Published the package on pub.dev with complete documentation and usage examples.
- pub.dev: pub.dev/packages/my_progress_bar
